Subject: Re: response to request for consultation

Dear Mr. Linton,

Thank you for your continued correspondence with the Shawnee Tribe, and for the U.S. Nuclear Regulatory Commission Office of Nuclear Material Safety and Safeguards' interest in establishing a consultative relationship with the Shawnee Tribe.

In particular reference to the Chillicothe, Ohio, project, we would like to continue consultation on an as-needed basis. However, the Shawnee Tribe does not have any cultural resources information specific to this project and unique to the Shawnee Tribe. In cases such as this, we are thus forced to rely on the State Historic Preservation Office for (1) an assessment of the need for archaeological or historical research, or, if such research already has been performed, for (2) the SHPO's concurrence with the research report's findings and recommendations.

You have shared with me already the results of site file searches and known sites in and around the area. We remain interested, if any additional research is performed or findings are garnered, in knowing the results, regarding which we may have some additional comment. We would appreciate it, if further research is performed, to be forwarded the formal summary section from the archaeologist's or historian's report to the SHPO. You may e-mail this or, alternatively, fax it to 918-542-2922. As well, in the event that archaeological materials are discovered during the course of construction or other project-related activities, we likely will wish to consult further.

Please continue to keep us informed regarding the SHPO's concerns and decisions; you may e-mail or fax copies of their official determination regarding the project. We applaud the thoroughness of your efforts in this matter.

We also appreciate your efforts to communicate with us electronically as much as possible and help us to decrease the amount of paper waste and storage.

s/s
